

# SCARY THINGS

Music & Lyrics by Steve Titford

- Verse 1      Over Ennville, there's an eerie chill  
Darkness is descending extending  
Over and within, no imagining  
There's a creepy feeling freewheeling
- Verse 2      This town won't know what's about to hit it  
Lock down those grownups  
No kidding around  
Feel the rumbling underground
- Bridge 1     Watch out for the suspense  
Watch out for malevolence  
Watch out for the shadow of trepidation  
(Yeh, yeh, ha!)
- Go now, get yourself clear  
                Go now, get away from here  
                Go now with the panicking population
- Chorus 1     Running from their scary things  
Bumping in the night  
Everybody clings  
To the morning light  
Hoping that their scary things  
Disappear and they will be alright

Middle            So many fears you find  
                      In the chasms of your mind  
                      That make your heart beat like a drum  
                      That make your senses go numb  
                      Are thoughts that we can overcome  
                      As one  
                      Together let's take 'em on... now!

Bridge 2            (Yeh, yeh, ha!)  
                      So long to the suspense  
                      So long to malevolence  
                      So long to the shadow of trepidation

Chorus 2            We can face those scary things  
                      Bumping in the night  
                      'Cause our courage brings  
                      Darkness into light  
                      Making all those scary things  
                      Disappear so we can face those

Chorus 3            Scary things  
                      (Scary things)  
                      In the night  
                      Courage brings  
                      Darkness into light  
                      Making all those scary things  
                      Disappear so we can be alright

Coda                We can face those scary things
